

## PRODUCT DETAILS

# MASCARE

### CERTIFIED DISPOSABLE SURGICAL MASK "TYPE 2"

Good breathability ( $PA / cm^2 < 40$ ) and high bacterial filtration ( $BFE > 98\%$ )

- 1° "Side-face" layer - in contact with face, in soft non-woven fabric.
- 2° "Inner" layer - Meltblown: blocks fine particles (PM 2.5).
- 3° "World-side" layer - exterior, made of non-woven fabric, filters larger particles.

They are equipped with a comfortable tubular elastic for ears and an adjustable nose clip. Heat-sealed finishes.

### CERTIFIED DISPOSABLE SURGICAL MASK "TYPE 2"

boxes of 50 pieces

cod MASCARETP2

Available in boxes of 50 pieces,  
Divided into 5 practical bags of 10 pieces each

## HOW TO WEAR IT

It is very important, before using the mask, to wash your hands well, or rub them with alcohol-saluting hand sanitizer gel.

To wear it, you have to take it from the elastic bands and bring them to your ears, avoiding touching the inside of the mask. Accompany the fabric so that it covers the nose and mouth, bringing the lower edge under the chin.

Squeeze the flexible part of the upper edge of the mask so that it adheres well to the nose.

These masks are disposable and must be replaced once used.

To remove it, it must be taken again from the elastics, being careful not to touch the inside of the surgical mask.

Once thrown in the general waste bin, it is important to wash your hands again.

## HOW TO DISPOSE OF IT PROPERLY

Throw it in the unsorted collection, after placing it in a sealed envelope.

**RESPECT THE PLANET, DO NOT THROW ME ON THE GROUND**

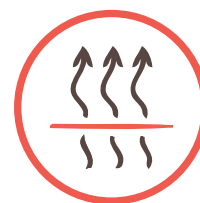

### CERTIFICATION
